

# Methicillin-Resistant Staphylococcus Aureus (MRSA) Bacteraemia Rate

*Staphylococcus aureus* is a germ that lives on the skin and mucous membranes of healthy people. Occasionally, *staphylococcus aureus* can cause an infection. When *Staphylococcus aureus* develops resistance to certain antibiotics, it is called Methicillin-Resistant *Staphylococcus Aureus*, or MRSA.

**Measure:** The number of new hospital-acquired MRSA bacteraemia cases per 1,000 patient days.

## MRSA Rate

Rate	0	0	0	0	0	0	0
Total # of Cases	0	0	0	0	0	0	0
