

Your Hospital, YOUR CARE

C R I T I C A L C A R E

INTENSIVE CARE UNIT

- Nine beds dedicated to critical care medicine, with hemodynamic and respiratory support, intensive monitoring
- Admission when you experience a heart attack, unstable angina, difficulty breathing requiring mechanical support, or need careful management of blood pressure
- Patients present with a mix of cardiac, medical, and surgical health conditions
- *ICU has admitted 546, 564, and 606 patients a year from 2023-2025, totalling 6,030 patient days*

"Our mom was in the ICU fighting a serious illness and we were faced with some very difficult decisions. Through every tear, long night, and uncertain moment, the ICU team stood by us not just as medical professionals, but as kind and compassionate human beings. They treated our mom with such tenderness and care, and they treated us with patience, understanding and empathy. We trusted them completely and they never let us down."

— M.H. & J.H. (Community Members)

*CCRT Lead Nurses
Rebecca Karkoulas and Kelly Speer*

CRITICAL CARE RESPONSE TEAM

- 24/7 CCRT Nurse supports inpatients in all areas of the hospital
- Provide assessment and intervention for at-risk patients to help prevent decline or complications
- Follow patients who have transferred out of the ICU
- Use their critical care nursing experience, with expanded medical directives, to accelerate diagnosis and care
- *CCRT completed 183 consults in both December 2025 and January 2026, its first two months in operation*
